

## How to set up your awning standard

- 1 Place the centre of the awning on the boom with the ropes on both railing sides.
- 2 Pull the awning to the back until the opening is at the end of the boom. Close the opening with the velcro strip.
- 3 Close the buckle to secure the closure.
- 4 Position the back of the awning with the rope.
- 5 Fix the front side of the awning with the large strap around the mast. Close the strap with the buckle.
- 6 And with the small strap around the boom. Close the strap with the buckle.
- 7 Tighten the straps. Use the rubber band to keep the strap ends together.
- 8 Connect the ropes to the railing on both sides to position the awning. Start with the luf side from front to back.
